

February 2006

Dear Business Owner:

**Lacrosse is coming to Whitman Hanson High School!**

Our School District has agreed to allow lacrosse into the High School sports program. The program is to operate on the Junior Varsity level. In two years the program will be reviewed for a Varsity program. Whitman Hanson will then be offering a program that is already available in Abington, Pembroke, Hull, Hanover, etc.

There are well over a hundred boys and girls registered in the Youth Lacrosse program that can benefit from an established program in the High School. The Whitman Hanson Lacrosse Booster Club has been established to meet this goal. Our objective is to secure the funds required for personal equipment, uniforms, field equipment, coaching, coaching aids, officiating, transportation and so forth.

One of the ways in which we are trying to achieve that goal is to seek out businesses, such as yours, that would be willing to donate funds to allow these young men and women the opportunity to work and train in this exciting and competitive sport.

We hope that you will be able to contribute to this program. We have included our non profit identification for your records. In addition, if you have any questions or if you wish to take a larger part in the development of this program, please call us at the numbers listed below.

Thank you for your time and assistance in developing this program!
